

DIVAKAR R

M.Sc. SOFTWARE SYSTEMS (INTEGRATED)

✉ rdivakar1125@gmail.com 📞 +91 8015165547 🌐 GitHub 🔗 LinkedIn 🏠 LeetCode

PROFILE

Passionate software student with a strong interest in software development, data analysis, and Python programming. Skilled in problem- solving, data processing, and visualization to uncover meaning insights. Eager to apply my technical skills and creativity to develop innovative solutions and drive continuous improvement in a dynamic environment.

EDUCATION

M.Sc. Software Systems (Integrated) , Coimbatore Institute of Technology	2023 – Present
CGPA: 7.73 (Till 4th Sem)	Coimbatore
Class XII , National Model Matric. Sec. School	2021 – 2023
85%	
Class X , National Model Matric. Sec. School	2020 – 2021

SKILLS

Languages — C, C++, Python (FLASK & DJANGO), Dart, Java (Basics).

Data/AI — MySQL, DSA, Machine Learning.

Web — HTML, CSS, Java Script, MERN STACK Development.

Version Control — Git, GitHub.

Soft Skills — Communication, Teamwork, Collaboration.

AREA OF INTRESTS

- DBMS
- FULL STACK DEVELOPMENT
- OOPS
- UI Designs

PROJECTS

SSRetails – Textile Database Management, (PostgreSQL, Django, React) ☑

- **Developed** a centralized database system using PostgreSQL to manage extensive records of top textile market companies, ensuring high data integrity and scalable storage. **Built** a dynamic React.js frontend integrated with Django REST Framework, enabling real-time searching, filtering, and updating of company profiles and inventory data.
- **Designed** an optimized backend architecture to handle complex queries and relationships, streamlining the retrieval of market data for efficient decision-making.

FoodieFlow – Management & Delivery System, (Python (Flask), MySQL, HTML/CSS) ☑

- **Developed** a full-stack food ordering and delivery management system using **Flask** and **MySQL**, focusing on efficient order processing and customer experience. **Implemented** a unique direct WhatsApp chat system, allowing customers to communicate directly with the delivery person and select their preferred rider.
- **Built** an administrative panel with features to verify and approve new driver details and provide restaurants with detailed sales analysis reports for monitoring business performance.

SmartRide – Bus Management System, (Django, PostgreSQL) ☑

- **Designed and built** an interactive Smart Bus Management System prototype during a **24-hour hackathon**, providing the admin with comprehensive tools to manage college and school transport facilities. **Created** a streamlined digital process for students to apply for and receive their digital bus passes directly through the application from the college side.
- **Developed** an administrative interface to monitor bus routes, driver schedules, and student passenger data, ensuring effective management of the transport network.

FUN WITH ME – Generative AI Platform | TensorFlow, OpenCV, Django, PostgreSQL, YOLO ☑

- **Developed** a multi-module Machine Learning Web Platform integrating four distinct AI services, managed through a robust **Django/PostgreSQL** backend. **Built** a **Face Recognition** module utilizing **OpenCV** for real-time video stream processing and a **Convolutional Neural Network (CNN)**, trained with **TensorFlow**, to achieve high-accuracy identity verification.
- **Integrated** generative models for content creation, including an **Image Generator** powered by a specialized architecture (e.g., **YOLO**-based image processing for style transfer/inpainting) and a **Video Creator** module.

CERTIFICATIONS & ACHIEVEMENTS

- Python for Data Science (IBM) ☑
- Edu Tantr Intern. (MERN STACK) ☑
- TypeWriting Gov. Certified.
- 24- Hour Hackathon in SREC.
- FIT INDIA CLUB SECRETARY.
- Code relay – 2nd Price – CIT.
